

mean radius was less than or equal to 17.0800

mean texture was less than or equal to 22.4550

mean perimeter was less than or equal to 105.2500

mean area was less than or equal to 696.9500

mean smoothness was greater than 0.0793

mean compactness was greater than 0.1016

mean concavity was greater than 0.0672

mean concave points was greater than 0.0269

mean symmetry was greater than 0.1819

mean fractal dimension was greater than 0.0725

radius error was greater than 0.2125

texture error was in between 0.4953 and 2.4155

perimeter error was less than or equal to 3.4375

area error was less than or equal to 73.1950

smoothness error was greater than 0.0041

compactness error was greater than 0.0395

concavity error was greater than 0.0281

concave points error was greater than 0.0120

symmetry error was greater than 0.0133

fractal dimension error was greater than 0.0058

worst radius was less than or equal to 17.5100

worst texture was less than or equal to 31.2700

worst perimeter was less than or equal to 117.4500

worst area was less than or equal to 953.7000

worst smoothness was greater than 0.0966

worst compactness was greater than 0.2715

worst concavity was greater than 0.2233

worst concave points was greater than 0.0635

worst symmetry was greater than 0.2002

worst fractal dimension was greater than 0.0931

80 trees came to the conclusion that the patient has Breast Cancer while only 70 trees came to the conclusion that the patient doesn't have Breast Cancer, so the model has come to the conclusion that the patient has Breast Cancer
